Wells Electric Service began in 1975 and is one of the top places in Dayton, OH to get backup generators installed. They've been doing this for over 45 years! This local business is known for being really good with their customers, offering great generators, and setting them up for homes and businesses.

They have a team of electricians who know a lot about different kinds of backup generators. These generators help keep the lights on when the regular power goes out. They listen to what their customers need, think about their budget, and see where the best spot is to set up the generator.
